REFERENCE LETTER

To whom it may concern,

I am writing in support of Mr. Kevin Toner to further his study at your university or to start a new career at your company. As his supervisor during his internship, it is my pleasure to recommend him to you.

Mr. Kevin Toner worked as an Intern in the Business Solutions department in Makolab S.A. from 17 June 2019 to 20 September 2019. His work was about website development.

Kevin Toner worked on improvements In Makolab ERP system and he received several functionalities to implement. The tasks required backend development skills i.e. writing SQL Server and ASP NET MVC C# code.

He had no technical difficulties in accomplishing any of these tasks. The only problems he experienced were related to advanced business logic which drives our ERP system. He did not let any of these difficulties to endanger the success of the project by productive communication with his leading developer which helped him understand any details of the system he needed to know to complete the tasks.

He also had no problem with fixing the errors reported by QA team or improving his code after code review done by our senior developer. All the functionalities he prepared were deployed to the production system on schedule.

In addition to his dedication to the project, he was willing to communicate during the internship. If he had any concern about the project, he would not hesitate to ask questions and to look for improvements. If he had any problem with programming, he would ask our colleagues for help and discussed what methods there are and which one was better to achieve a task.

During this period, Mr. Toner impressed me in accomplishing his task excellently by putting a lot of effort into learning something new and being willing to communicate with other colleagues.

Best regards

Mateusz Brożyna
